

# Tailored Resume

Okay, I need to help the user tailor their resume for a Generative AI Developer position at Visteon. Let me start by understanding the job description and requirements.

First, the job is about developing AI/ML solutions, particularly with frameworks like TensorFlow and PyTorch, and cloud platforms like Azure. They also emphasize NLP, computer vision, and backend development with FastAPI and Django. The role requires collaboration with cross-functional teams and a focus on scalable, efficient models.

Looking at the user's resume, I see they have experience as a Web Developer, but their skills and projects are more aligned with AI and GenAI. I should reframe their experience to highlight relevant AI projects and skills.

The user's summary needs to reflect their expertise in GenAI, mentioning tools like LangChain and OpenAI. I'll make sure to include their proficiency in Python, Flask, and deployment on AWS, even though the job prefers Azure. Maybe note their adaptability to Azure if needed.

For the experience section, their current role as a Web Developer should emphasize AI-driven features, NLP, and ML. I'll rephrase their bullet points to focus on AI-related tasks and achievements, quantifying where possible, like reducing onboarding time by 80%.

The skills section should be reordered. I'll prioritize AI/GenAI, then programming languages, followed by data handling and other relevant tools. This aligns with the job's technical requirements.

Projects need to showcase AI applications. I'll pick the ones that use LangChain, OpenAI, and NLP, highlighting how they improved processes or efficiency. For example, the Resort Agent App used OCR and OpenAI for ID scanning, which is a solid example of applying AI to real-world problems.

Certifications should include those relevant to AI and ML. The user has certifications from LangChain, Hugging Face, and OpenAI, which are perfect for this role.

I'll ensure the education section remains factual but perhaps add a note about relevant coursework if any, though the user didn't mention specifics, so I'll keep it as is.

Finally, I'll structure everything in a clear, concise manner, using bullet points and bold headings as per the instructions. The goal is to present the user as a strong candidate for the Generative AI Developer role by aligning their experience and skills with the job

requirements.

## SAMUEL BEGIN

CONTACT: beginsam004@gmail.com | +91 80564 62125 | [www.samuelbegin.xyz](http://www.samuelbegin.xyz) |

LinkedIn: samuelbegin

## SUMMARY

Innovative GenAI Developer with expertise in integrating Large Language Models (LLMs) using Python, Flask, and LangChain. Skilled in fine-tuning GPT and LLaMA models, backend development, and API optimization. Experienced in deploying scalable AI solutions on AWS and leveraging Hugging Face for rapid prototyping. Passionate about solving complex problems and driving AI innovation with production-ready solutions.

## EDUCATION

M.Sc. Physics | Scott Christian College, Nagercoil | 2021-2023

B.Sc. Physics | NMC College, Marthandam | 2018-2021

## EXPERIENCE

Web Developer | AK Info Park Pvt. Ltd., Nagercoil | Jul 2023 – Present

- Led a team of 3 to develop CRM systems, CMS, and APIs for mobile app deployment
- Focused on app security, third-party integrations, and AI-driven features
- Delivered client-tailored solutions leveraging AI, NLP, and ML

## SKILLS

- AI/GenAI: LangChain, LangGraph, Ollama, Hugging Face, OpenAI, Gemini, Gemma, Agentic AI, RAG
- Programming Languages: Python, JavaScript, SQL
- Frameworks: Flask, Django, React.js
- Data Handling: NumPy, Pandas, Matplotlib
- Cloud Platforms: AWS (EC2, S3, Route 53, CloudFront)
- MLOps: Model deployment, versioning, performance optimization
- Databases: MySQL, Firebase
- Tools: Postman, Git, FileZilla
- Soft Skills: Problem-Solving, Analytical Thinking, Public Speaking, Fast Learner

## PROJECTS

Falls Regency – Resort Agent App | Mar 2025 – Apr 2025

- Automated ID scanning (Aadhaar, Voter ID, DL) for instant guest check-in using Tesseract OCR, OpenCV, OpenAI, LangChain, and Flask
- Reduced onboarding time by 80% and minimized errors

AI Drive – Document Writing Assistant | Oct 2024 – Nov 2024

- Developed AI assistant using RAG, LangChain, FAISS, and OpenAI API for context-aware responses
- Integrated SQL + FAISS for structured/unstructured data retrieval
- Built low-latency React interface for enhanced customer support

7Nian – Food Delivery App | Jul 2024 – Sep 2024

- Designed REST APIs for core app features
- Built automatic delivery agent assignment algorithm
- Reduced costs by minimizing reliance on Google Maps API

## CERTIFICATIONS

- LangChain – KodeKloud
- Applied AI with Hugging Face Transformers – LinkedIn
- OpenAI GPT-3 for Developers – Infosys Springboard
- Text Embeddings using LLMs – Infosys Springboard
- Python for Data Science – Learnbay
